

Pure. Simple.

So your having a baby

Firstly, congratulations...

If you're reading this brochure then no doubt you are looking to book a session or have booked a session and want to know what to expect. It's important you read and understand every element of your session from how much it costs, how long it takes, what to wear and how to settle your baby on the day.

This will help your session flow more easily and keep your photo session stress free, so you can sit back, chill and let me work my magic.

- Fully trained in safe newborn posing
- 3 simple packages to choose from

my studio

About your photographer

Fully Trained & Baby Led

Newborn photography is an investment and a luxury product. Therefore before you secure your appointment its nice to know a bit about who you are booking.

I am a 30 year old mum of 4 based in Lincolnshire (Charlie 9, Jack 8, Grace 3 & Ruby 6 months)

I love babies! (hence why I have 4)

I was trained by Guild of Photographer judge, Claire Elliott in my studio, and master of light, Gary Hill. ASIFGP, ANPS, CrGPP. This means that I have been shown in person and handled babies in a safe manner. All my training has been on a 1-2-1 basis to ensure I fully understand the techniques involved.

My sessions are baby led, if your baby doesn't want to sleep I will photograph your baby wrapped up, in a natural way instead.

The studio

Located just outside of Boston

My studio is located just outside of Boston (PE220AY) It's a home studio next to my house, and has a light, airy feel to it. The studio is a shoe free zone (feel free to wear socks / slippers to keep your feet warm!) This is for hygiene reasons for our newborn guests.

The studio has a range of newborn photography props from wraps, bonnets and headbands.

My style is simple, organic and pure.

The session.

The session.

Get the most out of your booking

Your session will last 1.5-2 hours so please allow for this.

The studio will be toasty warm. This is so that we can regulate baby's temperature to keep them warm & comfortable and asleep!

Your baby will sleep more and pose easier if you can try to keep him / her awake beforehand. Expect to give your baby a feed on arrival or mid way through your session to keep baby happy and full.

Parents are asked to wear light coloured outfits for their portraits. A simple white vest, matched with a blouse and jeans tends to be most of my clients choice of clothing.

Mini Maternity shoot
studio or location

Capturing Siblings

I love to capture sibling photographs for mum and dad. During these photographs the safety of your newborn is priority.

Whether you have 1 or 4 children we will capture them altogether.

Just let the studio know in advance so we can make arrangements.

A newborn baby is lying on its side on a light-colored, textured surface. The baby is wrapped in a white, textured blanket. The baby's eyes are closed, and its hands are resting near its face. The text "Session Pricing" is overlaid in the center of the image.
